

How to Install and “Register” the MCP Suite 2007 Software

1. Open “Internet Explorer” for your browser.
2. Go to the web site <http://mcppremium.com/downloads.htm>
3. Click “Next >” by the appropriate version (Basic or Professional)
4. There will be two or three files to download. Select the first one by clicking the “Download” link. When prompted, click to “Open” or “Run” the file. After downloaded is complete, installation will begin. Once complete, REPEAT for the second and third file download, if any.
5. When everything is complete, you will see a new icon on your desktop that looks like this:

Note: If you do NOT see an icon like this, you may have chosen to “Save” each download instead of “Run” it. If you are certain that you did “Run” each download, please email Technical Support for further assistance at support@mcppremium.com.

6. Now you will need to double-click on the icon. When you do so, you will see this pop up:

NOTE: If you do not see this popup, please make sure that you downloaded/installed all files shown at the download page, including any “Update” files.

7. Type in the email address you provided to MCP Premium when you purchased, and click “View License Agreement”. The License Agreement will pop up for you to read. When done reading it, close it, and check the box next to “I Agree”.
8. Click “Register”. The software will now verify your License and if correct, will allow you to enter the program. All done!

NOTE: If you encounter any problems with the registration, an error reporting window may pop up, so you can email us to resolve the issue. Some things that may help to try:

- a. Double-check that you typed your email address correctly
- b. Make sure you are connected to the internet
- c. Make sure you disable any internet firewall, such as Norton Internet Security

If you need any further assistance with installation or registration, please email support@mcppremium.com
